DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

ART REJECTION:

Claim Rejections - 35 USC § 103

2. Claims 1-96 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grube et al(Grube) in view of Lauber et al(Lauber).

-- With regards to claims 1-96, the command to enable or disable the sensor is met, since Grube teaches receiving command signals to control the subscriber units(22) thereby causing control of the sensor, since the sensor is a part of the subscriber unit. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate commands to enable or disable the sensors, since this would have facilitated monitoring and as well power conservation such that sensors would have been enabled only when desired by an operator of the system.

REMARKS:
